## Technical Data Sheet

### 'FAST-FIX' Dry Ridge Kit FFR-306

The new Thysis Fast-Fix Dry Ridge Kit provides a robust fixing for ridge tiles allowing the recommended 5mm ventilation if required. It is truly a universal dry ridge system, featuring a high quality ventilated ridge roll with pumped butyl to ensure the best water seal. Specially strengthened universal ratchet clips for the unions, give superior strength and durability whilst making sure clay and concrete ridge tiles present no problems. All necessary components supplied in the kit, enabling installation in inclement conditions in faster times than traditional methods. Available in 3mt, 5mt, 6mt and 10mt kits

- Ventilated Ridge Roll – 25mm Butyl strip – complies with BS5250:2011
- Ridge Batten Brackets – Manufactured from 1.2mm thick “Zintec” galvanized mild steel
- Universal Ridge Unions – Injection moulded in black reprocessed polypropylene
- Ratchet Clips and Screw Clamp – Injection moulded in Nylon for superior strength and durability
- 100mm Screws
- No special skills or tools required
- Materials packed in robust double walled corrugated box
